DR. ADESHOLA COLE

Award Winning Techpreneur
Woman of the year 2008 & Mentor.

My Story

I'd done a few admin jobs here and there (as we probably all have), and found myself working in the bank. I started off as a cashier and suddenly worked my way up to the bank manager position; a job that sounds so glamorous, but really isn't. So here I was managing a little team, selling loans and credit cards and all that juicy stuff, and before I knew it, time was ticking and I had been with the bank for almost ten years !

In that time I had 2 little promotions and a meagre pay rise, and every time I was promised all these great and wonderful things, that just never happened. I became tired and lost confidence in myself. I knew I had so much to give, but was just not given the opportunity to showcase my skills and expertise. I started to call in sick and my productivity at work dropped to an all time low. I had just also had my third child, and this also added to me discouragement within my career.

Then this happened.....I had heard about project management and business analysis, but hadn't the foggiest clue what they did or how it worked. All I knew was that the money was good -honesty is the best policy, as they say!.....So I took a gamble and enrolled on a course, giving myself 3 months to secure a role; I secured my first project management role in 4 months, so one month below target. It was later on that my passion was realised, and I began to mentor a lot of candidates, helping them secure roles. To date, I have successfully helped over 200 candidates secure roles as Project Managers, Business Analysts and so much more.

If I can do it, so can you...

If I can do it, so can you...

SUCCESS STORIES

Since our establishment in 2017, we have helped over 500 Candidates secure life changing roles all over the world.

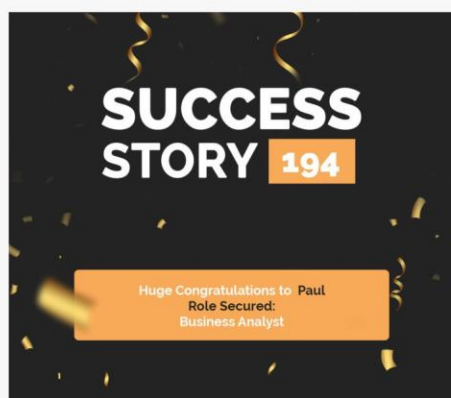

AO SS 243 | 2022

I joined Tritex April 2021 and was assigned to project Vault as the Business Analyst team lead. It was a wonderful and challenging experience. I have learnt a lot and made new friends that I can call family. I want to say a big thank you to Adesola, Muhammed, Jermaine, Kofo and my team members for their support and understanding throughout the duration of our project. Because of the quality of training and mentorship at Tritex during my BA training and project, I decided to enrol for a Data analyst training programme without hesitation, knowing that I would need it to further my Business analyst career. The programme was intense but great. I would like to thank Azeez for his help.

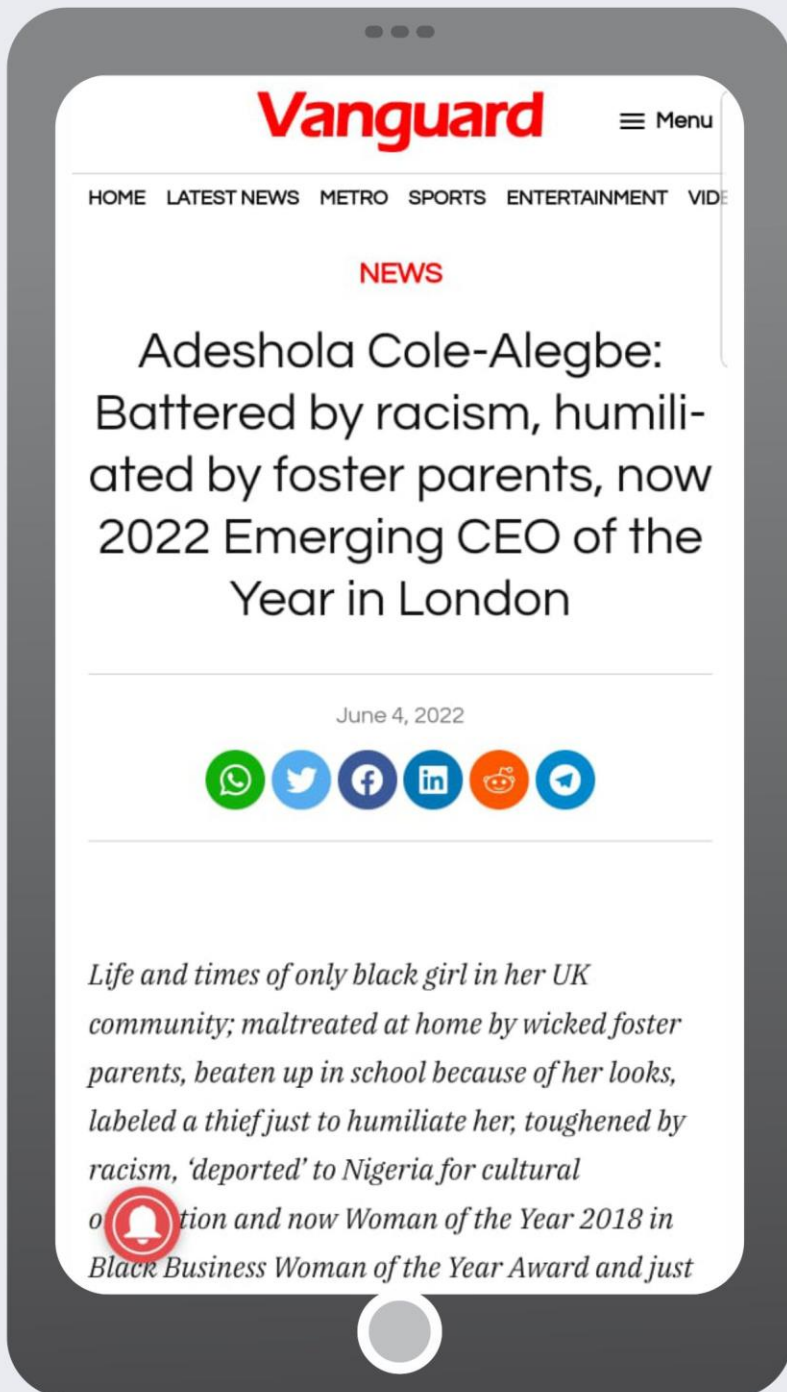

All the training, experiences, and support from tritek has helped me to land a job offer as a Business analyst. Access to the wealth of knowledge on LMS and Basecamp has helped me immensely. I want to thank God that I was directed to Tritex. Work hard, stay strong and believe in yourself and God and the sky will not be your limit.

NKIRUKA - SS 250 | 2022

My name is Nkiruka, I joined Tritex in June 2022 after attending the taster Session. I was recommended by a lot of people and when I heard Adeshola's story and achievements as well as the success stories of others who spoke during the taster session, I was inspired. It is heart warming to see someone who is willing to help others and give them the opportunity to grow. One thing that stood out for me at TriTek was how quickly we were put on a live project following our training and the robust mentorship we got during our job interviews. I was deputy Project Manager on one of the projects and my team delivered the project within 4.5 months. During that time, I learned how to plan and prioritize my work, how to collaborate effectively in a team, tailor communication to different stakeholders and deal with conflicts. As a result of the PM experience I got from TriTek, the support and encouragement I received from my project team members and mentor- Tolulope, wealth of knowledge on LMS, I felt confident and went on to apply for an IT project officer role. I was offered the role immediately after the interview. Thank you
